

The BUSWHERE GPS app is up and running. All parents/Guardians of USD 262 bus riders should have received an email invite. The email is sent only to emails set up in your students Infinite Campus account. Security is a priority so only families who receive a direct invitation are allowed to set up an account.

The downloadable app (free on Apple store or Google Play) is simple and easy to use, but comprehensive in terms of real time information to parents with a 4-5 second refresh. The app displays the route on the screen and allows parents to see the bus location, local traffic information, and the ETA at the selected stop.

The family will set up a user name and password to open a secure account. If necessary, the USD 262 Transportation department can send a notification to all parents if there is a major delay.

At this time only routes 1-14 will have BUSWHERE.

If you have yet to receive an email for your student or have questions, please contact USD 262 Transportation.
