

## Connecting a personal Android phone to USD262 Wireless

1. Download the district certificate to your phone [here](#)
2. Install it by clicking on the downloaded file
3. Name the cert VCPS-CA and choose WiFi for the description

4. Connect to USD262-Wireless
5. Where it asks for a CA certificate, select VCPS-CA(the cert you just added)
6. Enter your firstname.lastname in the Identity/username field
7. Enter your network password in the password field
8. Press Connect
9. It should then switch your device over to the appropriate network based on your username. If you still don't have internet, restart your phone and it should connect.
